ANIORRA NURSERIES Chestnut Hill Philadelphia

The Entrance to Andorra

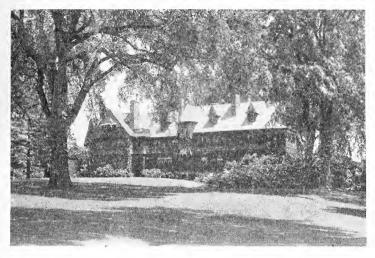

An Invitation to Andorra

HOSE who are interested in landscape art and the beauty of trees and plants out-of-doors are always cordially welcome at Andorra. Excellent highways through this beautiful rolling section of Pennsylvania, with its charm of Colonial manor house and country-place, offer inviting roads from every direction to visitors in motor cars. Train connections over the Chestnut Hill branches of both the Pennsylvania and Reading Railroads make Andorra a two-hour run out of New York and a half-hour from the heart of Philadelphia; from Chestnut Hill Stations a ten-minute ride on the City Line trolley cars brings one to the gates of the Nurseries.

Situated at the northern entrance of the far-famed Wissahickon Drive through Fairmount Park to Philadelphia, Andorra Nurseries are located in a rolling country offering a great variety of soils and exposures; with this great advantage of soils is coupled a range of temperature from the twenty-below-zero days of the Winter of 1917 to the hot dry Summers of this latitude, so that Hardy Trees, Evergreens and Shrubs, grown at Andorra, assure their success in every part of this country of varied climatic conditions to which their habit of growth fits them.

Enclosed is a detailed road map showing the good roads through this beautiful section of Pennsylvania for the convenience of those motoring to Andorra.

Each Spring and Autumn a catalog is issued which gives to those who have never visited Andorra a worded picture of the hundreds of varieties and sizes of trees and shrubs to be found growing here, and in these catalogs will be found articles which deal with various subjects of planting and landscape design of interest to the lover of things beautiful out-of-doors.

Beautiful in Its Setting of Trees and Shrubbery Borders

Country and Suburban Homes

ITHIN the last decade there has been a tremendous exodus from the cities in answer to the appeal of the country and the call of life out-of-doors which has resulted in the rapid development of country and suburban homes of large and small extent. The desire of every owner is to create an appropriate setting for his home in the midst of gardens and beautifully planted grounds.

To those interested in such planting Andorra Nurseries, over 1000 acres in extent, offers the selection of a stock of Evergreens, Trees, Shrubs, Vines and Hardy Perennials complete in assortment and unequaled in quality.

In 1886 we established a policy of growing exclusively ornamental nursery stock in wide rows with room for individual development and by frequently transplanting creating a fibrous root system which ensures the success of our trees and shrubs. Our stock is not to be compared with that ordinarily offered by other nurseries which do not use the same care or time in handling.

We have furnished stock for most of the famous large estates and parks in this country and to the most prominent landscape architects and gardeners, than which there can be no higher recommendation.

To Complete the Setting of House and Garden—Results in One Season

N common with our other American activities we demand no less speed in the completion of our gardens and the grounds which surround our new homes than in our business and building operations.

There is a natural pride and desire to make the grounds about one's home in keeping in appearance with the fine interior decorations and furnishings of the house, and a consideration of special importance is the actual monetary value added to a property so quickly by good planting.

The architect or owner, building a new house or remodelling an old place, does not care to wait for years for trees and plants to grow from small sizes to furnish a proper setting. Realizing this fact twenty years ago we started growing in our Nurseries specimen Evergreens and Trees so that to-day we are able to furnish nursery-grown stock in large sizes to fill the requirements of those who wish to plant to obtain an immediate effect.

Through this catalog such specimens in sizes and character not to be obtained elsewhere are noted and in addition we have many large specimens not mentioned. As limited space makes it impossible to adequately describe them and as the conditions

The House as the Builders Left It in the Early Spring

Andorra Trees and Shrubs Produced This Beautiful Result in Three Months

and requirements for the use of these large specimens vary greatly we invite the correspondence of those interested.

We know of no better illustration of the effect that it is possible to obtain by the use of these large specimens than that shown in the accompanying photographs. The setting of this house and gardens was obtained in one season by the use of Andorra Trees, Evergreens and Shrubs entirely.

In Winter the Surroundings were Equally Attractive with the Evergreen
Trees and Shrubs

Evergreen Planting Which Softens the Foundation of House or Terrace

The Decorative Value of Evergreens

HE beauty of deciduous trees and shrubs is wrought in stately lines of trunk and arching branch, of opening bud, gay flower and cool green of spreading leaf. These aptly suit the spirit of our changing seasons, while through nature's shifting scenery from white of Winter snows and flowered Spring to bronzing Autumn the Evergreens sound a pleasant note of contrast in form and color among their deciduous neighbors.

Varying in form from the spreading Yews and Junipers to columnar Cedar and Japanese Cypress they are especially appropriate in planting close to the house and garden, giving a proper setting to the architectural design and lending warmth of color to the Winter scene.

The Pines, Spruces, Firs and Hemlocks are pre-eminently fitting in border, screen or windbreak, where they form a beautiful background for smaller flowering trees and shrubs planted in front of them. Their pleasing color note of fresh needles in Spring and their interesting form accent the beauty and grace of Summer flower and the tracery of Winter twig and branch.

The Evergreens are later in starting into growth than deciduous trees and one of the most favorable times for Spring planting is in April and May. All of our Evergreens are lifted with a large ball of earth and fibrons roots,—"B & B."

Evergreen Trees

All Evergreens are lifted with ball and burlapped.

Rock Garden of Evergreens and Hardy Perennials

Evergreen Rock and Wall Gardens

HIS interesting form of garden in its many adaptations can be made a charming feature of nearly every place. A sloping bank set with scattered boulders, a dry retaining wall or an old-fashioned stone fence may serve as the basis of a rock garden made gay with bright-flowered Hardy Perennials from early Spring until late Autumn.

In Winter the Rock Garden will have an individual interest if liberal use is made of trailing Junipers and Savins, spreading Yews, dwarf Mountain Pines, Adams Needle and other low growing Evergreens together with Evergreen Shrubs like the Azaleas, Quince Berries, Evonymus and Loniceras, intermingled with the gray and brown of rocks.

A few of the Hardy Perennials whose flowers find an admirable setting among the Evergreens are Achillea, Ajuga, Alyssum, Aquilegia, Arenaria, Armeria, the hardy Asters and Chrysanthemums, Cerastium, Ceratostigma, Coreopsis, Dianthus, Gypsophila, Iris species and Fleur-de-Lys, Iberis, Myosotis, Pachysandra, Phlox subulata, Primula, Sedum, Saxifraga and Vinca.

The photograph above well illustrates the charming effect of a border of large growing Evergreens, small flowering trees and shrubs which serve as a background for the Rock Garden and extend a welcome to inviting shaded walks beyond.

Boxwood Hedges in a Formal Garden. A Tall Hedge of Japanese Cypress Encloses a Portion of the Garden in the Background.

Hedges

ItE treatment of formal terrace and garden, or grounds of small extent, where it is desirable to accentuate the architectural character of the design by including in it the grounds about the house, demands the trim neat lines of the clipped hedge. The line and form of masonry or wall is agreeably emphasized by the light and shade of hedges placed in proper relation, while the flowers and coloring of the garden are thrown in pleasant relief against the textured green of of enclosing hedges. The beautiful old Yew hedges of England find their replica in our country in the Hemlock (Tsuga), Japanese Cypresses (Retinospora), and many other evergreens, while the charm of green-hedged fields and lawns can easily be created with the Hawthorn (Crategus) and field Maples.

A walk through Andorra's hills reminds us of a few trees and shrubs admirably adapted to hedge planting, giving an idea of the great variety from which we can choose. Plants classed under medium height may sometimes be trained into high hedges, or may be clipped to a low height, dependent upon circumstances and vice-versa. The effect desired, and conditions, vary so greatly in hedge planting that we can advise you much more definitely if you will write giving us the require-

ments of your particular problem.

Formal Evergreens Seen Against a Dark Green Hedge

For Low Hedges

E Dwarf Cypress (Retinospora plumosa var. sulphurea).

E Japanese Yew (Taxus cuspidata).

E Japanese Evergreen Azalea (Azalea amana).

E Boxwood (in many varieties).

E Evergreen thorn (Cratagus pyracantha var. coccinea).

E Japanese Holly (Varieties of *Ilex crenata*). Wilson's Barberry (*Berberis Wilsonii*). Japanese Barberry (*Berberis thunbergii*).

For Hedges of Medium Height

E American Arborvitæ (Thuya occidentalis). E Siberian Arborvitæ (Thuya occidentalis var. Wareana).

E Golden Japanese Cypress (Retinospora plumosa aurea). Field Maple (Acer campestris). Hawthorn (Cratægus crus-galli). Barberry (Berberis vulgaris).

Rose of Sharon (Hibiscus syriacus).

Ibotan Privet (Ligustrum Ibota).
Regel's Privet (Ligustrum regelianum).

California Privet (Ligustrum ovalifolium).

Buckthorn (Rhamnus cathartica).

For High Hedges

E Norway Spruce (Picea excelsa).

E White Pine (*Pinus strobus*). E Japanese Cypress (*Retinospora plumosa*).

E Gray Cypress (Retinospora squarrosa).

E Hemlock (Tsuga canadensis).
Beech (Fagus sylvatica).

Hornbeam (Carpinus caroliniana).

E Denotes Evergreen varieties.

PINUS Thunbergii. JAPANESE BLACK PINE. Hardy; broad pyramidal head; foliage grass-green. 5 to 6 ft. Each \$6 00 6 to 7 ft. 7 50 Specimens. 7 to 8 ft. \$10.00 to 15 00	Per 10 \$48 00 60 00
P. virginiana (Inops). JERSEY PINE. Rapid growing. Place in groups or edge of woods, or in screens. 9 to 10 ft	
PSEUDOTSUGA taxifolia. (Douglasii.)	
DOUGLAS FIR. Beautiful soft, dark green foliage. Can be used for hedges. 2½ to 3 ft. Each \$3 50 3 to 4 ft. 4 00 4 to 5 ft. 5 00 5 to 6 ft. 7 50 6 to 7 ft. 8 50 Specimens. 7 to 9 ft. \$12.50 to 15 00	28 00 32 00 40 00 60 00 68 00

Broad-Leaved Evergreens Lend an Air of Welcome Cheeriness Both in Summer and Winter

The Year-Round Beauty of Evergreen Shrubs

ATURE has been liberal in the number of shrubs which are not only beautiful in the flush of Spring bloom and green leaf through the Summer, but which have the added charm of holding their deep green foliage through the cold Winter months, making cheery the Winter landscape.

With the strong appeal of out-of-doors answered by the year-round country and suburban home we have learned a great appreciation of these shrubs whose evergreen foliage softens and warms the bleakness of Winter. Most of them are hardy in protected places as far north as Boston, while from the latitude of Long Island south they can be used freely in almost any situation.

These shrubs are characterized by richness of deep green leaf, showy blossom and handsome berry and so are admirably adapted to planting near the house and gardens against background-borders of evergreen trees and the larger growing deciduous shrubs—there throughout the year their constant changing beauty is a never-ending pleasure.

Among the most beautiful in flower are the hardy Azaleas and gorgeous Rhododendrons, while the Hollies. Quince Berries and Evonymus have an added charm of bright berries while others are equally attractive in flower and foliage. They are best transplanted in April and May.

Evergreen Shrubs

Clipping Boxwood

Boxbush of every variety is very slow growing and will naturally retain a more or less compact habit of growth. All varieties, however, lend themselves to clipping in various shapes or hedges, especially *Buxus sempervirens*, the most common and well known Bush Boxwood; the clipping should be done in Spring before the buds start into growth.

BUXUS sempervirens. (Bush Form.)

BOXBUSH. Slow-growing, old-fashioned plant with incomparable depth and richness of billowy texture and color. Breathes spirit of Colonial gardens. Excellent for hedges or for specimens. Bush shape, nearly as broad as high.

Stately Old Boxbush Adds an Indefinable Charm to this Doorway

Boxwood

HE Box-bordered walk and flower garden, or doorway flanked by stately specimens of Boxwood create a feeling of age and charm of inestimable value in our gardens, and in the appearance of our homes. Andorra has long been famous for its rare old Boxbushes of large size that at once give character to the new place. Then, too, we have Boxwood standards, pyramids and bushes for hedges and edging in all sizes.

The recent prohibition on imported Boxwood by the Federal Horticultural Board will in no way affect our offerings, as the Boxwood which we list is growing at our nurseries. Appreciating the requirements of our patrons for Boxbush in large sizes, we set aside and have grown, with frequent transplanting in our nurseries, large quantities in many varieties, so that the risk and expense of collecting large Box from old places is obviated to those who desire large specimens for immediate effect. These large Boxbush are from 5 to 7 feet in height and almost as broad; they have taken on the beautiful modeling of billowy contour and rich appearance of the pompous guardians of some old Colonial house or garden; these plants from our nurseries move with a tremendous ball of fibrous roots and loam.

Balled and Burlapped "B. & B."

HE prime essential of success in transplanting to transplanting trees and shrubs is that they have a system of fine fibrous roots which are obtained at Andorra by frequent transplanting and pruning. Most deciduous trees and shrubs when they drop their leaves are in a dormant state, and do not require the same degree of care in handling as the evergreen trees which always bear their leaves, and so are always exposed to untoward conditions of drought and wind. To insure the success of our evergreens in shipping, their compact balls of fine fibrous roots are carefully lifted from the ground still surrounded by the damp protecting soil in which they grew, and securely wrapped in burlap, so that they are never exposed to the danger of drying out in shipment, and they will reach the purchaser in perfect condition.

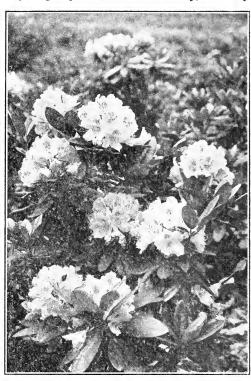

This is only an example of the attention which we pay to the many details which differentiate our service from that

of many other nurserymen.

Rhododendrons

BEST known of flowering Evergreen Shrubs, the "Rose Tree"—so called by classic Grecians—stands preëminent with its wealth of gorgeous blooms in rich color against the cool green leaves. There is a popular belief that Rhododendrons can be grown only in peaty soil; on the contrary, the only

limiting their use in temperate regions is the fact they will not thrive in soils strongly impregnated with lime. in which case it is necessary to ameliorate the condition of the soil with peat and leaf mould, otherwise most good garden soils are admirably adapted to the growth of Rhododendrons. The most important element of success with Rhododendrons is to protect them against the cutting winds of Winter by thick borders of other evergreens and

Rhododendrons are Most Beautiful when Planted in Masses, Their Blending Shades and Tints Gorgeous in Their Richness

deciduous shrubs, and to keep their roots moist in Summer by a heavy mulch of leaves. With these two simple needs in mind, no place need lack the beauty of the handsome Rhododendron.

Andorra Rhododendrons are grown on open hillsides, and can be depended upon to produce satisfactory results which cannot be expected of tender imported plants. The following list comprises varieties carefully selected for their hardiness and beauty of flower. Our stock comprises over 20,000 plants grown on the open hillsides of Andorra so that they are absolutely acclimated to our severe Winters and hot Summers; their hardiness and vigor are well proven.

No other flower is as rich in form and color as the Rhododendron, its glossy evergreen foliage a joy throughout the whole year

The Rhododendron Border

RHODODENDRONS thrive best in masses or groups and are handsomest where their beautiful colors are set off by a background of the dark green of Evergreen Trees, or in a corner of house or wall clothed with evergreen vines. At the edge of the Rhododendron border and blending it into the lawn the dwarf growing Junipers, Yews, Azaleas and Evergreen Euonymus are particularly appropriate.

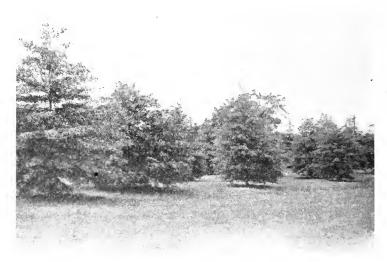

Large Nursery-Grown Tree Ready for Moving. Note the Fine Fibrous Roots

Large Trees on New Places

A NDORRA NURSERIES are equipped to supply large trees of thirty to forty feet in height, that are are in keeping in size and dignity with our spacious modern houses, these trees at once producing an immediate effect on estates which would otherwise be shadeless and uninteresting for many years. Prominent among the varieties of large trees which we have grown in our nurseries, and which can be successfully moved by truck or freight are Maples, Elms, Oaks, Lindens, Planes and the spreading Beech; among the Evergreens are Pines, Spruces, the Japanese Cypress and great Boxwoods.

In addition to these very large trees which are moved with an immense ball of earth and roots on special platforms, we call especial attention to the sizes of smaller trees in grades and quality not ordinarily offered by other nurseries. All our shade trees are grown in wide rows spaced so as to allow proper development of good heads and trunks of extra caliper and our frequent transplanting ensures their success on account of the quantity of fine fibrous roots produced.

In planting streets and avenues and in border and screen plantings you will gain several years by the use of Andorra trees.

Shade Trees in Groups at Edge of Lawn that Shut Out Disagreeable View Beyond

Shade Trees on Lawn and Avenue

ATURE spreads her Autumn colors with lavish freedom in gay tones of gold and red on Oak and Maple, and tinges with purple and brown the Elm and Ash, as through their falling leaves gradually appear the sturdy limbs and tracery of gray twig which will stand in stately promise, through the Winter, of opening bud and flower at the first touch of mystic Spring. No other feature of the tiny suburban bungalow or spacious country place is more necessary to its real enjoyment and comfort than the shade afforded in Summer by properly planted trees on street and lawn; no other feature of the out-of-doors adornment of our American homes adds so much to their general attractiveness and real value, as the trees which furnish a setting for the house and garden.

For planting singly or in groups near the house, for their shade or for landscape effect on lawn or meadow, there are the Maples, Lindens and Oaks in many varieties, and the graceful Elms suitable for the widest range of soils. Of quicker growth, no trees can compare with the symmetrical Norway Maple, giving a rich dense shade, and the spreading Oriental Plane of graceful foliage and interesting gray-green branches, the Willows with their graceful drooping branches and the Tulip Tree with its wonderful rich foliage and gorgeous bloom. Of the slower growing varieties there are the Beeches (Fagus) and the beautiful Maidenhair Tree, both of which make beautiful specimens.

SPECIMEN JAPANESE MAPLES

These characteristically Oriental slow growing dwarf trees have a distinct individuality in richness of form and color. Some varieties make most attractive sorts for Japanese pots or tubs on the terrace; other varieties make interesting specimens and groups or they are effectively massed in the evergreen border. Our large specimen trees are particularly interesting.

Typical Avenue of Beautiful Norway Maples

Street Trees and Civic Planting

O finer monument to civic beauty exists than the trees which arch the streets and avenues of our older cities and towns, no other one thing adds as much to the beauty and dignity of our public parks and grounds as their stately shade trees. These stand as a grateful memorial to the civic pride and forethought of our public-spirited citizens.

A wide range of trees offers for selection as street trees; appropriate sorts for suburban planting where there is ample room for root-development are the Maples, White and Green Ash, Tulip Tree, Pin Oak, Red Oak, Gingko and Elms. Where the parking space is more restricted no trees can compare with the rapid-growing Norway Maple and Oriental Plane, as they seem better able to withstand extremes of heat and drought than any others.

The parking space between curb and sidewalk offers an opportunity for planting not only trees but flowering shrubs and Evergreens and gives added protection to the suburban home against the noise and dust of street or road.

For planting of parks and public grounds the range of trees and shrubs is practically unlimited and in such plantings the value of the Evergreens for their richness and color should be constantly kept in mind.

FATSIA japonica. (See Aralia.) FRAXINUS americana.		
WHITE ASH. One of the handsomest of our large broad-headed trees suitable for street and avenue or park planting. In autumn the coloring of the foliage is unusually beautiful. 7 to 8 ft	Per 10 \$10 00 15 00	Per 100 \$80 00 120 00

Magnolia Glauca

SWEET SWAMP MAG-NOLIA. A beautiful tall-growing shrub or small tree thriving in damp situations, but equally happy in any good soil. The foliage is a rich glossy green and partly evergreen. The cup-shaped fragrant flowers with wax white petals are the crowning glory of this handsome plant. We cannot too highly recommend this magnolia.

Flowering Crab Apples Are a Mass of Pink and White in Spring

Flowering Trees

I N instances where it is not desired to plant the larger growing shade trees, a wealth of smaller growing trees is at our command, many of which have the added attraction of a profusion of beautiful flowers in Spring or Summer. Especially to be recommended are the Flowering Cherries (Cérasus), the white and red flowering Dogwoods (Cornus florida), while the rare Cornus Kousa of Japan is worthy of the better acquaintance of all. The Hawthorn (Cratagus) needs no better introduction than that which its place in English literature has given it. Standing quite alone in their wealth of gorgeous bloom in early Spring are the many varieties of Magnolias, their rich wax-like petals ranging in color from pure white, through soft tones of pink to rich deep crimson, in full, luxurious wide-These are followed a little later by the flung blossoms. dainty rose-pink bloom of the Ornamental Flowering Apples (Pyrus), the Tulip Tree, and in mid-Summer the Varnish Tree (Koelreuteria) bears its yellow blossoms.

As to the most pleasing landscape effect, groups of different varieties of these charming flowering trees planted against the background of evergreen border, or their use as individual specimens, or in groups in the open is to be impartially advised; their appearance is equally charming wherever they are used.

The Flowering Crab Apples (*Pyrus*) listed on opposite page are ornamental little trees clothed with fragrant flowers in Spring, followed by attractive yellow or orange Autumnal fruit.

Deciduous Trees for Screens and Windbreaks

By properly planting trees of quick-growing varieties in combination with slower growing, more permanent sorts, it is easily possible in a few years' time effectively to blot out objectionable views which may mar the outlook from house or lawn, at the same time by planting flowering trees, evergreens or shrubs on the lawn

side, producing an added attractive landscape feature.

The trees, found in this category, comprise varieties which are valuable for the purpose, on account of their quick-growing qualities, as the Birches and Poplars, or for the charm of gorgeous fall coloring, as the Pin Oak. The admixture of long-lived trees and flowering sorts with this group is advisable. In any mass planting of trees the quickest and most satisfactory results are obtained when the spaces between the trees are planted with an undergrowth of spreading shrubs.

Oriental Plane Tree.

ORIENTAL PLANE.

The proprietor of the Nurseries saw this tree in Europe many years ago and, realizing its great value as a street tree admirably adapted for city planting, introduced it extensively in this country. We have made a specialty of growing the Oriental Plane, spaced wide apart in the nursery rows, insuring a fine symmetrically-developtop, while frequent transplanting creates a thick fibrous root-system. Our trees are immeasurably superior to those grown without the care which we exercise, and will produce the most satisfaction and quickest results.

This rapid-growing, symmetrical, wide-spreading tree, together with the Norway Maple, are most suitable for city street planting. Attractive trunk and foliage. Rapid grower; fine, symmetrical head. Not bothered by insect pests or smoky, dusty locations. One of the best street and avenue trees on account of its deep top root which will not heave the pavement.

of its deep top root which will not heave the p

The Oak

One of the most beautiful of our American trees, long-lived and growing in a wide range of soils is the Oak.

On account of its long life and freedom from injury by storms the Oak is generally looked upon as an extremely slow growing tree. To the contrary some varieties grow quite as fast as our other hard wood trees, notably the Pin and Red Oaks. Both these varieties are admirably adapted to street, avenue and lawn planting, where a handsome permanent tree is required.

The other varieties are slower growing, but cannot be excelled

for lawn and large border planting.

for lawn and large border planting.

The Elm

Holding a distinctive place as a street tree or stately specimen the American Elm has become more widely known than some of the other varieties; these should share with the American species its popularity as they are adapted to a wide range of soils and possess the merit of being fairly rapid growers.

ULMUS americana

ULMUS americana.		
AMERICAN ELM. Vase-shaped head. Peculiarly appropriate for street or lawn planting, giving vaulted cathedral effect. 10 to 12 ft.; 1 to 1½ inEach \$3 00 10 to 12 ft.; 1½ to 1¾ in3 50 12 to 14 ft.; 1¾ to 2 in	Per 10 \$22 50 25 00 30 00 35 00 40 00 47 50 60 00	Per 100 \$180 00 200 00 240 00 280 00 320 00 380 00 480 00

An Effective Border Planting of Shrubs and Trees Screens the Street and Adds Charm and Interest to the Grounds

The Shrubbery Border

HEIR cheery blossoms among the earliest harbingers of Spring, a wealth of bloom throughout the Summer, and an Autumnal burst of vivid color in leaf, berry and twig, make the shrub borders a continuous source of interest and delight throughout the year. There can be no more beautiful enframement for lawn or garden than the border of shrubs accentuated here and there with evergreens or small flowering trees, sheltering the hardy herbaceous plants which form its boundary, a pleasant screen against drive or road, and shutting out from the beauty of our surroundings some obnoxious view.

We regard the breaking bud in early Spring with delight, for with it comes a realization that Winter's backbone is broken. All through the cold months we have watched the jealously-folded bud with the anticipation of gay flowers to come. An infinite variety of shrubs herald Spring's advent with riotous bloom. Among the first are the Azaleas, choice dwarf shrubs with radiant colors so effective against evergreens; the Magnolia, tall and graceful, whose magic blossoms appear almost overnight after the first warm days of Spring, and the flowering Dogwood appear after the jauntily flowered Golden Bell have spread their mist of yellow in the shrubberies. Later come the pink and white of the Weigelias and Deutzias, the graceful charm of stately Lilacs in rich coloring of many varieties, and Bush Honeysuckles and Mock Oranges with their wealth of handsome bloom.

Deciduous Shrubs

NATIVE AZALEAS

Small shrubs adapted for massing in shrubbery borders and naturalizing in woods. Prolific bloomers extending over a period from April to June; showy among evergreens. Under Evergreen Shrubs will be found many other varieties of great beauty; see page 33.

H. quercifolia. OAK-LEAVED HYDRANGEA. Large leaves		
turning deep bronze in Fall. Low shrub for wood's edge. 2 to 2½ ft	12 50	

An Effective Border of Flowering Shrubs. Brilliant with Showy Berries in the Fall

Berried Shrubs for Fall and Winter

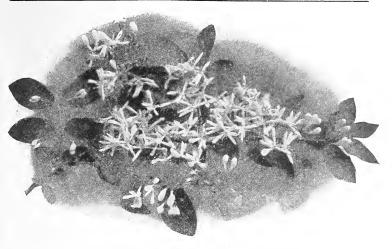

HE shrub border is poorly planned if it does not include some of the handsome berried varieties which, from late Summer until well into the Winter, add their charm of bright colors ranging from white to blue, black and scarlet. Their brilliant berries make most attractive house decorations and fill the shrubberies with song birds.

A background of Evergreen trees adds to the beauty of the bright berried shrubs, making appropriate contrasts to their brilliant coloring and harboring the birds. Many of the Evergreens also have berries like the Junipers, Yews and Hollies and the Evergreen Thorn with its flaming scarlet berries in great clusters and the black-berried Japanese Hollies.

Some of the shrubs whose berries are especially attractive are the Aronias, Barberries, Dogwoods, Cotoneasters, Eleagnus, Evonymus and Ilex in both deciduous and evergreen varieties, the Privets and Bush Honeysuckles, Myrica, Rhamnus, Rhodotypus, Sumacs, Elderberries, Symphoricarpus and the Viburnums.

HYPERICUM aureum.		
LARGE-FLOWERED ST. JOHN'S WORT. Low shrub, useful for edging borders; yellow flowers in mid-Summer. 12 to 18 in.	Per 10 \$2 50	Per 100

Standard Wistarias in a Flower Garden

Vines and Ground Covers

INES and climbing roses fill a distinctive need in softening and blending architectural forms with the rest of the planting about house and garden. The climbing Ivies and Evonymus used on uninteresting walls relieves their monotony and bareness and other climbers on trellis or arbor admirably frame window and doorway in green and blossom.

Pergolas and arbors shaded with Wistaria, the rapid-grow-

Pergolas and arbors shaded with Wistaria, the rapid-growing Kudzu Vine, the scarlet flowered Trumpet Vine, Clematis or Honeysuckle are features of beauty and utility. There can be no better or more effective screen against unsightly objects than a vine-covered trellis or high fence;—the quick-growing Honeysuckle is one of the best vines for this purpose as it

holds its foliage well into the Winter.

We find these vines and trailing plants together with some of the trailing shrubs of great value in clothing unsightly slopes with verdure. These slopes and banks are often a source of trouble on account of the surface washing or slipping during heavy rains, but the inter-lacing roots of Honeysuckle, Periwinkle or Bittersweet will obviate this difficulty. Forsythia suspensa, Rosa wichuriana, Lycium chinense and Yellow Root are also adapted for this use.

For carpeting bare patches of soil in shady places where grass will not grow we have the evergreen English Ivy, Japanese Spurge (Pachysandra) Periwinkle and Lonicera Japonica, which form a carpet of green in what would otherwise be an ugly spot.

One of the most useful and interesting plants for filling in odd corners near walls or steps, along the base of house or terrace or as a pretty edging plant for Evergreen borders there is the very hardy *Evonymus* in a number of varieties.

Vines, Climbing and Trailing Plants

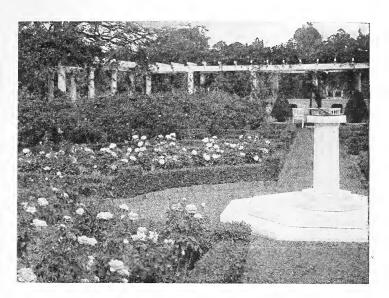

Vines are an essential to every place—there are walls, fences, arbors, unsightly banks and odd corners to be covered. A selection for every purpose can be made from the following varieties.

A TENTON A	Per 10
AKEBIA quinata. FIVE FINGERED VINE. Shiny foliage; clusters of small chocolate colored, fragrant flowers.	
5-in. pots Each \$0 75	\$5 QU
AMPELOPSIS quinquefolia. VIRGINIA CREEPER. Rapid growing for fences, rocky slopes and banks; Fall foliage rich crimson. 5-in. pots	5 00
A. quinquefolia, var. Engelmanni. ENGELMANN'S CREEPER. Similar to previous sort, but will cling to walls. 5-in. pots	5 00
A. tricuspidata. (Veitchii.) BOSTON IVY. Strong, clinging vine of rapid growth; good Fall color. Best for walls. 5-in. pots; heavy	5 00
ARISTOLOCHIA sipho. DUTCHMAN'S PIPE. Strong vine; large light green leaves; purplish pipe-like flowers. 5-in pots	12 50
BIGNONIA grandiflora. TECOMA. Large brilliant orange red flowers. 2 to 3 ft.; field-grownEach \$0 75	4 00
B. radicans. TRUMPET VINE. Strong climber with orange flowers in mid-Summer. 2 to 3 ft	4 00
CELASTRUS scandens. BITTER-SWEET. Rapid-growing; orange-yellow fruit. Its rank growth makes it useful on rough banks in billowy masses. 2 to 3 ft.; field-grown per 100, \$25 00 3 to 5 ft.; heavy; field-grown.per 100, \$35 00	2 50 3 50
	3 00
CLEMATIS coccinea. RED CLEMATIS. Rapid growing, covered in Summer with coral-red flowers. 4-in. pots	7 50
C.—Large Flowering. Henryi, white; Jackmani, purple; Jackmani, white; Duchess of Edinburgh, white, double: Mme. Edouard Andre, redEach \$1 00	7 50

CLEMATIS paniculata.		
BRIDAL BOWER. Rapid grower, handsome		
foliage, absolutely covered with white fra- grant flowers in late Summer followed by		
fluffy seeds.	Por 10	Per 100
5-in. pots		\$40 00
C. virginiana.		
WOOD CLEMATIS. Similar to last, but		
more open grower. Use for banks and walls.		
4-in. potsEach \$0 75	5 00	
EVONYMUS. See also pages 38 and 82.		
E. radicans. (Evergreen.)		
EVERGREEN CREEPER. For buildings or		
ground cover; slow growing. 2-year; field-grownEach \$0 50	2 50	20 00
3-year; field-grown	3 50	25 00
E. radicans variegata. (Evergreen.)		
VARIEGATED EVERGREEN CREEPER.		
Similar to last, but leaves variegated with		
creamy white and pink.	0.50	
1 ft.; field-grownEach \$0 75	3 50	
E. carrieri. (Evergreen.)		
CARRIER'S CREEPER. Large, handsome, glossy, evergreen leaf; climber for buildings		
and walls.		
2-year; field-grown	3 50	25 00
Extra heavy stockEach \$0.75	. 6 00	
E. vegetus. (Evergreen.)		
BROAD LEAVED CREEPER. Scarlet		
fruited, strong growing evergreen vine. Handsome foliage. Use as ground cover.		
1-year; field-grown	2 50	15 00
2-year; field-grownEach \$0.75	3 50	$\frac{15}{25} \frac{00}{00}$
3-year; extra heavy \$1 00	6 00	
JASMINUM nudiflorum. See page 40.		
HEDERA helix.		
ENGLISH IVY. Evergreen, strong growing,		
clinging vine. Use on walls or ground cover-		
ing in shade. 4-in. pots	3 50	25 00
LONICERA—Honeysuckle.	0 00	20 00
Strong growing vines of merit for their semi-		
evergreen dark green foliage and their fra-		
grant Summer flowers. Useful for arbors,	•	
covering walls and on rough banks.	9 50	95 00
4-in. pots Each \$0 50	5 50	25 00
L. japonica.		
JAPANESE HONEYSUCKLE. Fragrant yel-		
low flowers. 4-in. potsEach \$0 50	3 50	25 00
	3 00	3 0 00
L. japonica, var. aurea reticulata. VARIEGATED HONEYSUCKLE. Varie-		
gated golden foliage.		
4-in.pots	3 50	
L. japonica, var. chinensis.		
CHINESE HONEYSUCKLE. Purplish-green		
foliage; fragrant yellow flowers.		
4-in.potsEach \$0 50	3 50	

LONICERA japonica, var. Halleana. Dark, glossy green foliage; fragrant flowers from July till Fall. One of the best as fragrant thick screen on lattice or porch. 4-in pots		Per 100 \$25 00
L. Brownii, var. fuchsoides. Scarlet flowers showy throughout Summer; scarlet berries 2-year old; field-grownEach \$0 75	5 00	
PERIPLOCA græca. SILK VINE. Excellent porch vine; dark green foliage; purple flowers in July. 5-in. pots	7 50	
SCHIZOPHRAGMA hydrangeoides. CLIMBING HYDRANGEA. Strong growing. clinging vine with handsome Hydrangea-like flowers. Strong plants in pots		
VITIS—Grapes. Useful for covering rough walls, fences and trees; rapid growers; large handsome foliage.		
V. æstivalis. SUMMER GRAPE. Fruit small and black. Field-grown	5 00	
V. Labrusca. FOX GRAPE. Fruit purplish-black to brown. Field-grown	5 00	
WISTERIA chinensis. CHINESE WISTERIA. Hardy climber with families of large violet-blue flowers. Trellis, porch and arbor work. 2 to 3 ft.; pots	10 00 20 00	
W. chinensis Standards. Large heads covered with violet-blue flowers; handsome foliage; for garden. Stems four feet high. Standards, 5 to 6 ftEach \$10.00 to \$15 00 Specimens. Extra heavy\$20.00 to 25 00		
W. chinensis alba. WHITE WISTERIA. Same as above, but with white flowers. Heavy; field-grown; 3 to 4 ft Each \$2 50	20 00	
W. frutescens. Strong climber, lilac-purple flowers. 4 to 5 ft.; field-grownEach \$1 00	7 50	
Reeds and Grasse	es

ROSES 101

Roses

ROM the earliest times we know that where any attempt at gardening was made at all, great dependence was laid on the Rose. The Persian garden has handed down a race of Roses and the medieval gardens gave us others and so down to the present time gardeners have vied with each other to produce new and wonderful varieties of the classic plant. In consequence there is now a Rose for every situation; the single Roses for the shrubbery border, the trailing Roses for covering steep banks, the old-fashioned Moss Roses, the Hybrids, and the Everblooming Tea Roses for the garden.

Cultural Directions

Preparation of the Ground. Always select an open, sunny place, exposed to full light and air. Roses appear to best advantage when planted in beds or masses. Roses will grow in any fertile soil, but are much improved in bloom, fragrance, and beauty by rich soil, liberal manuring, and good cultivation. The ground should be subsoiled and well spaded to the depth of two feet or more, and enriched by digging-in good cow-manure or other good fertilizing material. Roses are gross feeders and require a quantity of manure. Renew old beds by decayed sods taken from old pasture-land.

Planting. When the ground is thoroughly prepared—fine and in nice condition—put in the plant slightly deeper than it was before, spread the roots out evenly in their natural position, and cover them with fine earth, taking care to draw it closely around the stem, and pack firmly with the hand. It is very important that the earth be tightly pressed down on the roots. Budded Roses should be planted 3 inches below the bud, but in all cases avoid deep planting. A mulch of litter will be found very beneficial.

Watering. If the ground is dry when planted, water thoroughly after planting, so as to soak the earth down below the roots, and, if hot or windy, it may be well to shade for a few days. After this not much water is required, unless the weather is unusually dry.

Pruning. Old and decayed branches and at least half the previous season's wood should be cut away early each Spring, and a little cutting-back after the first blooming will insure more late flowers. Climbing and Pillar Roses should not be cut back; but the tips of the shoots only should be taken off, and any weak or unripe shoots cut out altogether.

Fall and Winter Treatment

In the Fall the Rose-beds should have a good dressing of stable manure or other fertilizer. The Winter rains will carry the strength to the roots, and the remaining matter makes a nice mulch, which in many places is all the protection necessary. Where the Winters are not very severe, tender Roses may be covered with clean rye-straw, leaves, or evergreen branches, not too thickly, but so as to permit considerable circulation of air and not to retain water; nothing should be used that will ferment, heat, or rot. The object of covering is to break the force of sudden and violent changes, particularly in March, when the plants should be protected from the sun rather than from cold, the sudden thawing of the frozen wood doing the damage.

Books on Rose Culture

For those who wish to go more thoroughly into the fine points of Rose-growing we recommend the "Manual of the American Rose Society," which is supplied with a year's membership. For a more elaborate work we suggest the "Practical Book of Outdoor Rose-Growing," by George C. Thomas, Jr. We shall be very glad to supply either of these books.

EVERBLOOMING HYBRID TEA ROSES

These hybrids are among the choicest, for their fragrant flowers are borne continuously from early June till the late frosts of autumn. In the Northern sections of the country they require the protection of a mulch of straw or soil in Winter.

\$1.00 each, \$8.50 per 10

Not less than five plants of a variety at the ten rate

Bessie Brown, creamy white.

Betty, ruddy gold.

Carolina Testout, rose.

Dean Hole, silvery carmine.

Earl of Warwick, salmon pink.

General McArthur, bright crimson.

Gruss an Teplitz, crimson.

J. J. L. Mock, imperial pink.

Kaiserin Augusta Victoria, primrose.

Killarney, pink and Killarney, white.

Lady Pierre, deep copper salmon.

Lady Ursula, flesh pink.

Laurent Carle, brilliant carmine.

Madame Abel Chatenay, carmine rose.

Madame Edouard Herriot, coral red.

Madame Leon Paine, silvery salmon, orange yellow shadings.

Madame Segond Weber, rosy salmon.

Maman Cochet, pink and Maman Cochet, white.

Mary, Countess of Ilchester, crimson.

Mrs. Aaron Ward, Indian yellow.

Mrs. A. R. Waddell, rosy scarlet, opening reddish salmon.

My Maryland, salmon pink.

Ophelia, salmon pink.

Richmond, scarlet.

Souvenir du President Carnot, flesh shading white.

Viscountess Folkstone, creamy pink.

HYBRID PERPETUAL ROSES

Hardier than some of the other Hybrids, the June roses reward us with a glowing wealth of bloom in early Summer and again in September.

\$1.00 each, \$8.50 per 10

Alfred K. Williams, carmine red.

Baroness Rothschild, rose.

Captain Hayward, carmine crimson.

Eugene Verdier, rose flesh.

Frau Karl Druschki, white.

General Jacqueminot, scarlet.

Madame Gabriel Luizet, silvery pink.

Magna Charta, rose.

Margaret Dickson, white.

Mrs. John Laing, pink.

Mrs. R. D. Sharman Crawford, rose pink.

Paul Neyron, deep rose.

Prince Camille de Rohan, deep crimson.

Ulrich Brunner, cherry crimson.

HYBRID PENZANCE BRIERS

\$1.00 each

Amy Robsart, deep rose.
Annie of Gierstein, dark crimson.
Brenda, blush.
Flora McIvor, blush white.
Lady Penzance, coppery yellow.
Lord Penzance, ecru.
Meg Merrilees, crimson.
Minna, white.

CLIMBING ROSES

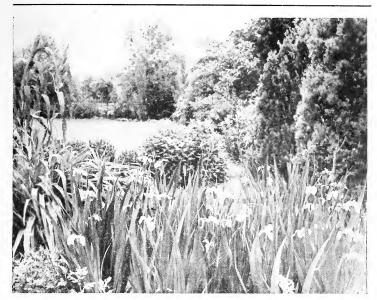

On arbor, porch or trellis, the showered glory of the climbing rose makes its appeal in simplicity and charm.

\$1.00 each, \$8.50 per 10

Not less than five plants of a variety at the ten rate

Christine Wright, double—wild rose pink. Crimson Rambler, crimson.

A Herbaceous Border that will furnish a succession of cut flowers for the house

Hardy Herbaceous Perennials

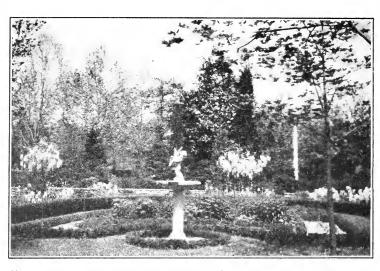

HERE is a strong appeal in the gardens of old farmhouse and cottage with the glowing yellow and orange Day-lilies, bright flowered Phlox and Peonies, and their show of hardy Chrysanthemums; a demonstration of the ease with which these plants are grown and the little care they require when one thinks how little time the busy country housewife can spend in gardening. The old-fashioned perennials have been enriched with many improved varieties and species, and every corner of the grounds can be kept bright throughout the whole growing season; the tall growing varieties can be effectively planted in the shrubberies, their flowers showing against the background of evergreen or shrub, and the lower sorts blending the edge of shrubbery and lawn in naturalesque borders, or the wood edge made gay with some of the Asters, Foxgloves, Ferns and many others.

Of flowering plants, two things are demanded—Varieties which will brighten our lawns and gardens, and which can be cut for house decoration—these hardy herbaceous plants reward us bounteously in both requirements. The height, color and flowering season of each variety are given in the following list. The tall growing varieties should be planted about eighteen inches apart and the lower-growing sorts about ten.

Quantities of 5 and 50 will be furnished at the 10 and 100 rates, respectively; quantities of less than five plants of one sort are sold at the ten-rate, plus 50%.

Hardy Chrysanthemums Bright in the Autumn Sunshine

When frost has browned the other flowers of the garden, these hardy plants burst forth in a profusion of bloom, in colors which seem to catch the most delicate tints and shades of bronzing leaf and gorgeous autumn sunset, while some foretell the purest white of coming snow, and pink of purpling shadows.

Planted in September or early October in the hardy garden, border or lawn at edge of shrubbery, they will yield a wealth of bright flowers in late autumn, and fill the house with cut flowers.

HARDY CHRYSANTHEMUMS—POMPON VARIETIES

\$2.50 per 10; \$20.00 per 100

Allentown-Bronze yellow.

The Decorative Blooms of Japanese Iris make it an Admirable Flower for Cutting

IRIS

Almost before the dead leaves of winter are cleared away, we are greeted in earliest Spring by the blue and gold of the dwarf Iris; through May and June the Siberian and other sorts add their charm to the display of delicate-petalled Fleur-de-Lys, and the July sunshine is filled with the revel of blooms of Japanese Iris, ranging in softly blending colors from the purest white, through delicate tints of lavender and blue, to deepest royal purple. In any sunny place at water's edge, in shrubbery, border or garden, the Iris lends its charm.

Reference to the following lists show the range of beautiful colors of our choice varieties:

JAPANESE IRIS (Iris Kæmpferi or lævigata) \$3.50 per 10, \$25.00 per 100

Apple Blossom—White ground slightly flushed with rosy purple. Apollo-French white with prominent violet markings.

Blue Danube-Deep indigo-blue with violet shadings.

Diana-Reddish purple flaked with white.

Goldbound-Pure white.

Hanniball—Porcelain lined with rose purple and lavender.

Hyde Park-White marbled with reddish purple.

Mahogany—Deep velvety mahogany red. Mt. Hood—Violet-red shading deep blue toward center.

Neptune—Rosy-purple, suffused with light blue.

Oriole—Purple amaranth.

Prince Camille de Rohan-Rich reddish-purple with indigo-blue.

Princess Clothilde—Ash gray blushed with purple.

Pyramid-Deep violet-purple veined with white.

Shadow—Deep blue shading to indigo.

(Continued on page 113.)

JAPANESE IRIS—Continued Templeton—Violet-purple marbled with white, Vesta—Distinctly veined with purple. Victor—Porcelain veined with blue.

PÆONIA-PEONIES

Rich in an infinite variety of color, from white through tints of pink and rose, to darkest crimson, these hardy plants grace garden, bed or border with gorgeous bloom in May or June, and their fragrant flowers are most decorative when cut for the house or porch. Whether against a background of evergreens or shrub border, or in the garden, they yield a rich return in blossoms. They are best transplanted in August or September, but may be moved in very early spring, and should be planted about two feet apart in good ordinary garden soil.

We are making some changes in our extensive plantations of peonies, and can offer strong plants from some of the best varie-

ties, in assortment, for fall planting, at exceptional values.

Garden Assortment of Mixed Colors \$3.00 per 10 plants; \$25.00 per 100 plants; \$200.00 per 1,000 plants

SINGLE PEONIES

The single varieties have been much neglected in favor of the double sorts, but they are quite as showy, especially for massing in the shrubbery borders, holding their blooms well above the foliage, giving flowers of delicate texture and color.

PHLOX PANICULATA—HYBRID PERENNIAL PHLOX

A succession of flowers of greatest beauty from early July until frost, in softest tones of pink and rose, salmon, mauve and silvery white in great panicled blooms, will brighten the hardy border of mixed varieties of Phlox. Easy of culture, and perfectly hardy, the plants can be used at the edge of shrub border or in the garden, spaced about eighteen inches apart.

CHOICE VARIETIES

\$2.00 per 10; \$15.00 per 100

Garden assortment of mixed colors of our selection, \$1.75 per 10; \$12.50 per 100

Albatre. Dwarf. White dense panicles.

Bacchante. Medium; early. Crimson, shading lighter to center.

B. Comte. Tall; medium. Intense rich purplish crimson.

Czarina. Tall; late. Pure white, pyramidal spikes.

Candeur. Dwarf; early. Pure white.

Caran d'Ache. Dwarf; early. Rosy carmine, tinged with rose.
 Champs-Elysees. Medium; early. Intense rich purple-crimson.
 Henri Murger. Medium. Large, pure white, large carmine center.

Independence. Tall; early. Pure white, large flowers.

James Galloway. Medium. Cherry-red.

halo; large flower.

La Vague. Medium; early. Silvery rose.

Le Mahdi. Medium. Round panicles, well-formed flowers of metallic-violet.

Lothair. Medium; early. Cerise-salmon with crimson eye.

Le Feu du Monde. Medium; late, Flame color.

Madame P. Langier. Medium; early. Salmon-pink; dark eye. Miss Lingard (P. suffruticosa). Tall; early. Fine, free-flowering white.

Ornament. Early; medium. Bright clear rose, very large panicles.

R. P. Struthers. Tall; early. Bright salmon, crimson eye. Selma. Tall; early. Delicate rose, distinct cherry-red eye. Sunshine. Medium; early. Bright red, crimson eye with light

T. H. Slocum. Medium; early. Vivid crimson, with dark eye.

Ferns

- ADIANTUM pedatum (Maidenhair Fern). 1 to 2 ft. Moist, shaded positions.
- **ASPIDIUM acrostichoides** (Christmas Fern). 1 to 2 ft. Evergreen. Dry or moist soils in shady places.
- A. Felix-mas (Male Fern). 2 ft. Semi-shaded positions, dry or moist soils.
- A. Goldianum. 2 to 4 ft. Semi-shaded positions, dry or moist soils.
- A. marginale. Evergreen. 1 to 2 ft. Shaded positions, dry or moist soils.
- ASPLENIUM Filix-formina (Lady Fern). 2 to 3 ft. Open or shaded positions, in moist or dry soils.
- BOTRYCHIUM virginianum (Moonwort). 6 to 12 in. Shaded positions, moist or dry soils.
- DICKSONIA punctilobula (Boulder Fern). 2 to 3 ft. For open positions; forms large plantations.
- ONOCLEA sensibilis (Sensitive Fern). 1 to 2 ft. For open planting and wet soils.
- O. Struthiopteris (Ostrich Fern). 2 to 4 ft. For open positions, dry or moist soils.
- OSMUNDA gracilis (Flowering Fern). 2 to 4 ft. Open or shaded positions, and moist soils.
- O. Claytoniana. 2 to 5 ft. For open plantings, dry or moist soils.
- O. cinnamomea (Cinnamon Fern). 2 to 5 ft. For open or shaded positions, in wet soils.
- WOODSIA obtusa. 6 to 12 in. Shady places, in moist soil.
- WOODWARDIA angustifolia (Chain Fern). 1 ft. Open or shaded positions, in moist soils.
- The above varieties, 50c each, \$3.50 per 10, \$30.00 per 100.

Peonies Are Most Effective in Rich Masses

The Home Fruit Garden

To meet a demand for Fruit trees in larger sizes than those ordinarily offered by the fruit nurserymen, we have grown a limited quantity of trees of the best varieties in large sizes (marked *), which will obviate the long wait for trees to come into bearing. We are not growers of fruit in quantities, but are in close touch with reliable fruit growers and on large lists of 2-year-old trees will be pleased to secure you close prices.

Helpful Hints on Planning

HILE there are numberless books and magazines dealing in detail with the subjects of soil preparation, cultivation and pruning of hardy trees and plants, we think that a word on some of the problems of planning is not amiss.

First of all plan your planting and order the nursery stock well in advance of the planting season, so that the utmost advantage of the seasonal rains will insure success. The Spring planting season starts as soon as frost is out of the ground, when all deciduous trees, shrubs and perennials can be transplanted. Evergreens of all sorts should be transplanted just before the new growth begins, from April till June. In the Fall the procedure is reversed, the Evergreens being ready for transplanting from August to October, when the new growth is mature, while deciduous trees, shrubs and perennials are transplanted from late September until the ground is frozen.

Remember that the cost of preparation, planting and aftercare is the same for inferior nursery stock as for the bushy fibrous-rooted stock grown at Andorra and that *results* in planting are of most importance.

Various articles in this Catalog will be helpful in the suggestion of the most effective use of trees and plants and in their arrangement we can take no better guide than Nature where colonies and groups of the same or similar varieties of plants are always the most beautiful and successful in their growth. After all, Nature's reasoning is simple, for trees and shrubs planted in groups close together afford each other a mutual protection and with their shade prevent the drying out of their roots by wind and sun.

Therefore let us plan our planting naturally in borders and groups with here and there a specimen for pleasing contrast, and rather than have the borders present a "spotty" appearance by the use of a great number of varieties obtain the benefit of mass as well as individuality by using a smaller number of well chosen varieties in groups and colonies.

Conditions of soil and exposure vary the problem at times, but as a general guide for use in estimating the quantities of trees and plants required, we give below a few suggestions for assistance in planning. Our booklet, "Planting Instructions," is sent with every order; it contains detailed directions for preparation of soils, planting, pruning and care of our stock.

Borders and Screens of Evergreen and Deciduous

Trees. (See pages 6, 48, 64, 74 and 84.)

The spacing will vary with the width of the border, but as a general rule estimate the trees about 10 feet apart each way and here and there groups of deciduous trees spaced 12 to 15 feet apart can be introduced. An underplanting of shrubs spaced at about 4 feet will form an effective ground cover.

Hedges. (See page 20.)

It is important to plant closely and in the case of Privet, it is desirable to plant in double rows. Privet, 9 to 12 inches. For low hedges space 12 to 18 inches; for medium hedges, 18 inches to 2 feet; for high hedges, 2 to 4 feet.

Evergreen Foundation Plantings. (See pages 6, 32, 36, 42 and 97.)

Select varieties which according to height will be in scale with the architecture; vary the composition by the use of accenting pyramidal or columnar forms with low rounded or spreading masses. Bear in mind the pleasing contrast of colored needles and foliage and the richness imparted by the flowering Evergreen Shrubs. Estimate plants at an averagee of three feet apart or less. The use of low Evergreen ground covers planted about 12 inches apart as an irregular edging is attractive.

Rhododendrons. (See pages 42, 46 and 97.) Plant in groups or borders spaced 3 to 4 feet apart. **Trees.** (See pages 47, 48, 59 and 64.)

We quote a prominent landscape architect in a recent issue of "Landscape Architecture" on the subject of tree planting. "We have noticed during the past summer, as never before, the beautiful effect produced when trees are planted close together. We remember as the most perfect avenue we have ever seen that at Hyde Park on the Hudson. The trees are Oaks and they are (if our memory is right) not over fifteen feet apart in the rows and perhaps not twenty-four feet from one row to the other." The effect of specimen trees is most telling when they are planted in groups.

Shrub Borders and Boundary Plantings. (See pages 6, 32, 42, 64, 74, 84 and 97.)

In very few cases should a bed or border be less than an average width of 8 or 10 feet in order to produce a pleasing effect. On large places and parks it will develop into the shrub "plantation" of large extent with the beauty of massed effect. Plant strong growing shrubs at about 4 feet, medium growers at 3 feet and dwarf varieties at about 2 feet or less.

Roses. (See pages 101 and 102.) Plant 24 inches apart.

Herbaceous Borders and Gardens. (See page 105.) Plan your borders and gardens so that there will be a continuous show of flowers by planting closely with varieties intermingled to prevent "bare spotz" at any season. An English writer of note once said that there should be "one plant for every square inch," but good results are obtained by estimating one plant per square foot.

Index

HIS catalogue is based on a careful survey of our Nurseries taken every Summer and Winter, and the stock listed herein is growing at Andorra Nurseries in the sizes and varieties shown, so that one is enabled to select his requirements in exact sizes for the special purpose at hand, with the full assurance that the plants will be freshly dug (not taken from storage cellars or jobbers' packing cases) and properly packed ready for shipment for long distances, with the assurance of success after transplanting.

For the convenience of our patrons, the catalogue is arranged in groups as shown below, the species being alphabetically listed under their botanical names, as the common names vary greatly in different parts of the country.

The following index will serve for ready reference to Trees, Shrubs and Plants, not only by the botanical names, but by the common names as well.

In addition to the items listed, we have many varieties in quantities too small to offer in a general list; if you do not find the item in this list which you require, write us about it.

Directions for Ordering

Write plainly and give explicit directions as to address and mode of shipment. Shipments will be forwarded exactly as directed, but when without instructions, we will use our best judgment and forward by shortest and safest route. all herbaceous plants to be shipped by express.

All orders are accepted subject to previous sale and the fol-

lowing terms and conditions:

PRICES.—Prices in this catalog cancel all previous lists, catalogs and quotations. Prices are subject to change without notice. THE PRICES IN THIS CATALOG INCLUDE PACKING. OTHER NURSERIES CHARGE THE CUSTOMER FOR PACKING for shipment, amounting on some shipments to 50% of the cost of nursery stock. Our prices are f. o. b. our shipping station, or for local delivery f. o. b. customer's place if within 10 miles of our Nurseries. Arrangements can be made for distance deliveries by motor trucks or full truck loads if desired.

STOCK SPECIALLY SELECTED by customers at the Nurseries

will be charged according to the value of the trees chosen.

QUANTITY.—Lots of 5 and 50 will be furnished at the 10 and 100 rates respectively. Where no price per single plant is quoted lots of less than five plants of any one sort are sold at the 10 rate,

PACKING.—All goods are thoroughly packed, insuring best protection while in transit. ALL PACKING CHARGES ARE IN-CLUDED IN OUR LIST PRICES, except for specimen stock of unusual size, when the packing will be at cost.

TERMS, CASH WITH ORDER, except to persons who satisfy us as to their responsibility, when accounts will be due in 30 days.

Forwarding and Shipping

SHIPPING SEASON opens about March 1st in the Spring and August 1st in the Fall.

INSPECTION AND FUMIGATION .- Our stock is regularly inspected and certificate will be sent with each shipment. Stock will be fumigated when requested or when the State laws require it.

GUARANTEE AND CLAIMS.—All goods are guaranteed true to name, full count, up to grade, and in good condition when shipped. Any plant proving untrue to name will be replaced. Our stock is of the highest grade, thrifty and well grown, insuring its success if properly cared for after transplanting. As we have no control over its usage after it leaves our hands properly packed and in good condition, we can give no guarantee on the life of stock; however, any just complaint will receive out utmost consideration. Claims must be made within five days after receipt of goods. Stock delivered as per order and in good condition is not returnable.

GOODS IN TRANSIT.—All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition. Claims for damage while in transit must be made to the delivering company. Have delivering agent note the damaged condition on the freight bill, promptly present your claim to the transportation company and send copies of all papers so we can help you to secure prompt settlement.

ADDRESS all correspondence and orders not to individuals, but to
